

Samsung NP N310 HAA2US RAM Replacement

This guide will show the users how to upgrade or replace a ram.

Written By: Amir Afridi

INTRODUCTION

Accessing the RAM in this laptop is straightforward and requires minimal disassembly. You can upgrade the ram for better performance. One RAM slot allows up to 2 GB of DDR2 PC2-5300 667MHz 200-pin SODIMM

TOOLS:

- [Phillips #1 Screwdriver](#) (1)
-

Step 1 — Battery

 Make sure the laptop is powered off, and unplugged before removing the battery.

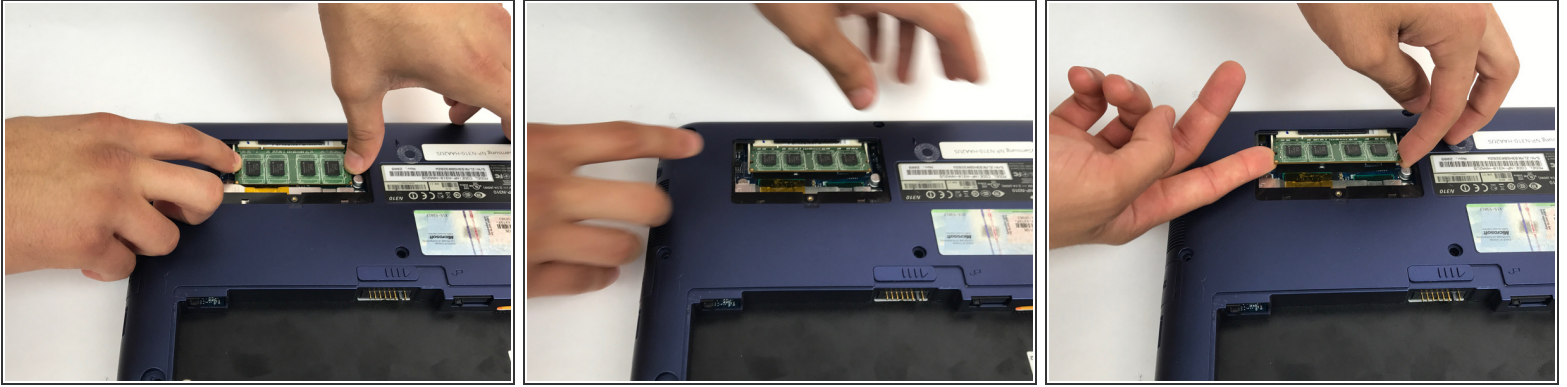

- Slide the battery switch to the unlock symbol, and the battery will pop up.
- Remove the battery.

Step 2 — RAM

- Locate and unscrew the 5mm screw on the small panel on the back that has 'memory' written on it.
- Pull off the memory panel.

Step 3

- Pull the 2 latches holding the RAM in, away from the RAM stick, and the RAM will pop up.
- Pull the RAM out of the slot, only touching the edges of the RAM stick

To reassemble your device, follow these instructions in reverse order.
